

Information on Viva Voce

Once the student clears all three stages of submission (proposal, mid-term and final for BDM project-primary route) and two stages (proposal and final- secondary route), they become eligible for viva voce. Vivas are usually conducted in the last week of every month. This might change, if Quiz or other events are scheduled during the period. Students clearing final submission, will receive an email from the operations and support team to book their viva slots. The viva is conducted over a period of 2-7 days/ month depending on the student numbers and availability of examiners. A viva slot booked once cannot be cancelled. In case of cancellations, the student can only appear in the next month.

Guidelines to be followed during the Viva Voce Exam:

1. Approx duration of viva voce is 30 to 60 mins.
2. Make sure you are formally dressed and join at least 5 mins before your viva.
3. Total number of slides equals ten all inclusive. Make sure it covers the key themes viz., about the business, pictures/ images, problem statement/ objectives, information on the nature of data collected (meta data, descriptive stats), data cleaning process, analysis (a max of 5 graphs which could be put in 1-2 slides), insights based on your analysis etc.
4. Slides can be made using Microsoft PowerPoint, Canva or other presentation tools. However, you cannot make a presentation with a word or pdf document.
5. Ensure that you have the raw data and the cleaned data with you- The examiner could ask you to perform some analysis based on this. If the data set is not available, the viva will be called off.
6. Once you make your presentation, the examiner will ask you questions. Any kind of misbehavior or showing disrespect to the examiner will result in cancellation of your viva.
7. If your presentation is not up to the mark, the examiner could ask you to make a presentation again. In such cases, your viva would be scheduled in the following month.
8. If plagiarism is detected at any stage, it will result in a failure grade.
